Profile Summary

Motivated Computer Engineering student with a focus on Python and AI. Experienced in building machine learning pipelines and GenAI applications. Skilled in data cleaning, visualization, and deploying dashboards via Streamlit. Passionate about solving real-world problems through NLP and predictive modeling.

Education

2021–2025 **B.E. in Computer Engineering**, *SAL Institute of Technology*, Ahmedabad, GTU
CGPA: [7.2]

Technical Skills

Languages Python (Expert), SQL, Bash
Data Science Pandas, NumPy, Scikit-learn, Matplotlib, Statistical Analysis
AI & ML NLP (NLTK), Computer Vision, Predictive Modeling, LangChain
GenAI LLM Orchestration (Ollama/Gemma3), Prompt Engineering, LangSmith
Tools Streamlit, Git, GitHub, Linux, VS Code

Key Projects

- 2024 **GenAI Chatbot Implementation**, *LangChain & Ollama*, Personal
 - Developed a local chatbot using Gemma3:1b; integrated LangSmith for tracing/monitoring.
 - Built responsive UI with Streamlit and implemented custom ChatPromptTemplates.
- 2023 **Air Quality Prediction**, *Machine Learning*, Academic
 - Cleaned large environmental datasets; achieved high accuracy using regression models.
 - Visualized trends to communicate insights to non-technical stakeholders.
- 2023 **Surface Defect Detection**, *Computer Vision*, Academic
 - Built a real-time identification system for manufacturing defects using image processing.
 - Optimized detection algorithms to improve industrial quality control speed.
- 2022 **NLP-Based Chatbot**, *NLTK & Python*, Personal
 - Created a retrieval-based system focusing on tokenization and sentiment analysis.

Core Competencies

- Data-to-Insight: Transforming raw data into predictive business models.
- Communication: Bridging technical complexity with business-centric results.
- Growth Mindset: Actively exploring LLM orchestration and modern AI tooling.
